

Training Workshop for Municipal Governments on the implementation of Asset Management Action Plans (AMAPs)

organized by the United Nations Department of Economic and Social Affairs (UN DESA) in partnership with the United Nations Capital Development Fund (UNCDF) and the President's Office-Regional Administration and Local Government Tanzania

Dodoma, Tanzania, 21-24 January 2019

The training workshop will be conducted by the United Nations Department of Economic and Social Affairs (UN DESA) and the United Nations Capital Development Fund (UNCDF) in collaboration with the President's Office Regional Administration and Local Government (PO RALG). The workshop is part of the broader United Nations effort to strengthen financing for sustainable development at the local level through the development of municipal asset

Financing for Sustainable Development Office of UN-DESA focuses on local governments in four target countries (Uganda, Kenya, Ethiopia, and Tanzania). The main objective of the workshop is to train local government officials on the implementation of an asset management action plan (AMAP) as part of their medium-term budget and a long-term sustainable development plan. The workshop will train government officials in providing support and financing for the asset management needs of municipalities.

Thursday, 24 January 2019

10:00 - 11:30 a.m. Training of Trainers (ToT) Session 1

Applying the AMAP diagnostic tool (word, excel and online tools)

Instructor: Ms. Linda Newton

11:30

A

Concept note

Background

Asset management both at the local and national level is a multifaceted and complex effort. It is the process of transparent and comprehensive inventory, valuation, lifecycle management (acquisition, operation, maintenance and disposal), strategic portfolio review, reporting and auditing of assets. It is also a multi-stakeholder effort. For example, at the municipal level, it requires the involvement of the city director, the mayor, the local council and multiple local departments, including planning, accounting, health, education, road, engineering, procurement and community development. At the same time, it must follow national guidance and coordinate with other layers of the government that manage assets located in municipalities.

practices against the stated objectives and a clear identification of gaps and areas for improvement; and (vi) the formulation of concrete actions by relevant stakeholders that address the identified gaps and link proposed actions to improve the management of the asset to the current and medium-term municipal budget.

This hands-on training support is thus timely since it will introduce to the participants the concept of proactive asset management to local governments and provide guidance to local authorities for

by UN DESA and UNCDF help assess asset management needs at the local level. Specifically, the training will address

- (i) Sharing experiences of current asset management practices in local governments with participants;
- (ii) Training of Trainers (ToT) To help central government officials and interested municipal officials to assist other municipalities and districts in the assessment of their current level of local asset management;
- (iii) Training local government officials in the formulation and implementation of a long term, customized asset management framework, including an asset management action plan (AMAP);
- (iv) Hands on support to local governments to develop AMAP and design/ implement Assets Management System
